

9th GEAR Quarterly Lecture
12 March 2024, 2:00-3:30 p.m. GMT (London time)
University of Reading, Whiteknights, Chancellors G08 (hybrid)

Professor Michael Clements
(ICMA Centre, Henley Business School, University of Reading)

“Uncertain Data”

The talk will draw on research over the last decade or so to explain some of the implications of revisions to official statistics for econometric modelling and forecasting. As usual, the lecture will be synchronously recorded and available for viewing *ex post* from the University of Reading’s Research YouTube channel. Here is the MS Teams [link to join](#) – but do try to come in person!

Michael P. Clements is Professor of Econometrics at the ICMA Centre, Henley Business School, University of Reading, and before that was at Warwick University Economics Department. He holds a DPhil in Economics from Nuffield College Oxford. He is a Distinguished Author of the *Journal of Applied Econometrics*, an Honorary Fellow of the International Institute of Forecasters, a Fellow of the International Association for Applied Econometrics, and is Series Editor of the Palgrave Texts in Econometrics and Palgrave Advanced Texts in Econometrics. He has published on forecast evaluation, non-linear modelling and business cycle analysis, real-time modelling and forecasting, and the analysis of survey expectations, with over 100 journal articles and book chapters, 5 books and 2 edited books.

The lecture is free to attend, online or in person, but if you come in person please send an e-mail to register your interest to Rachel Tregidgo at r.a.tregidgo@reading.ac.uk
